Monday, April 16th, 2012

7:00 PM

Grace Auditorium
One Bungtown Road
Cold Spring Harbor, NY

Keeping Children and Adolescents with Down Syndrome Healthy: Medical Updates for Physicians, Parents and Educators

Come learn about the medical conditions that every physician, parent and educator should be aware of. In this presentation, Dr. Brian Skotko reviews the new healthcare guidelines for people with Down syndrome from the American Academy of Pediatrics. How might behavior problems in the classroom be the result of an underlying medical issue? How do the conditions that go along with Down syndrome affect learning? Dr. Skotko provides the answers and action steps, stemming from the latest clinical research on people with Down syndrome. Help us help every individual with Down syndrome reach his or her full potential.

RSVP at connect@dsccli.org or call Virginia at (631) 261-8332

Co-sponsored by the Down Syndrome Connection of Long Island,
the Association for Children with Down Syndrome, the National Down Syndrome Society
and Cold Spring Harbor Laboratory
